Sioux Falls School District

Largest school district in South Dakota with 30+ schools in district all have AtmosAir and AtmosAware installed throughout.

Air quality has long been a consideration of the Sioux Falls School District...The COVID-19 virus heightened our awareness of the need for a superior air filtration system. Thanks to federal funding made available to schools, we were able to install this technology in every building in the Sioux Falls School District. This investment is one that will not only neutralize coronavirus, but the flu virus, and many other airborne concerns out there. Our highest priority is the health and safety of all students and staff. This system adds one more layer to their protection.

– Jeff Kreiter, Director of Operational Services for the District
